Final Havan (Classes X and XII)

February 17, 2023 (Friday)

Final Havan was conducted on 17.2.2023 for classes X and XII. Secretary Shri. Vikas Arya delivered the key note address to students on “Para Vidya and Aparā Vidya”. Here is the gist of the key note address.

As per the Upanishads, every man must be enlightened and educated on two different things. The first one is Knowledge about external things in the world, also known as Aparā Vidya. This is what we commonly learn in schools as physics, chemistry, mathematics etc. The second one is Knowledge about Self, Self-Realization, one's character and the Ultimate Power. This is also known as Para Vidya. Para Vidya is more important in life than the latter.

Dharma: - Dharma is a Sanskrit non-translatable word. Dharma is what is known as a person's duty in life. Every living and non-living thing in this universe has a dharma, even fire, trees, water, and us humans. The word Dharma is often misunderstood as a direct link to following religious customs. However, this is wrong. All substances have a dharma, but all substances do not have a religion. The Dharmic way of life was first known to mankind through the Vedas. Although most religions trace to have originated about 1000-3000 years back, the Vedas were as old as mankind, The Vedas do not support any religion in any of its mantras.

Rebirth: - High level of intelligence at a young age, as taken in the example of a young boy, can be an effect of rebirths. Rebirth or Punarjanma is when the soul moves from one body to other after death. Rebirthed beings usually tend to remember some information about their past lives. However, rebirth cannot be directly linked to any young person being highly intelligent as this could be because of other reasons such as heredity or control of spirits.

Struggle for Success: - If a human wants to achieve success, he must struggle. No human can achieve success without practical application of his knowledge. We must not only identify certain problems in the society but also work our way to solve them. Simply complaining about a problem may not be fruitful, however working towards a solution develops the minds thinking power, even if it yields failure. Failure is the first steps to success as long as we don't give up on working hard.

Types of Knowledge: -

Knowledge can be classified into three subtypes based on the source of it.

1. Pratyaksh Praman: - Knowledge acquired by experiencing it through the five senses of the body (sight, hearing, taste, smell, feeling)

2. Anumaan Praman: - Knowledge based on assumptions and estimations regarding it. This mode of knowledge may not be 100% accurate.

Class III students participated whole –heartedly in the drawing activity to show the seed germination.

Today’s newspaper is tomorrow’s waste paper. The same can be used to create the most beautiful art work. HEALTH CLUB

“A healthy life is not a choice, but a priority.” To induce the importance of this often overlooked aspect of our life, our school started the health club, which has been one of the most active clubs. Right from its creation, our health club has been arranging and conducting various events and contests for students of all classes to participate and learn. The academic year of 2022-2023 has been extremely fruitful with the health club being one of the most active clubs. Numerous engaging and enlightening programmes and activities were conducted. A commendable highlight of this year's events is the fact that a majority of them were presented by the senior students themselves, making these special and memorable for the audience. The club is grateful to the coordinators, participants and volunteers for making every activity planned, a grand success.

Inauguration Ceremony

The club kick started the year's journey with the inauguration ceremony on July 19th 2022. The event began with an invocation song by students of class 8. Following the pledge of all three clubs read out by students of class 10, students of class 9 and 10 were enlightened with the recent achievements in the field of science, environment and health, which was well appreciated and well received by the audience. The list of events planned for the academic year by all the three clubs were shared with the students who responded with enthusiasm. On the whole, the event was a well organised and a well-executed one.

Importance of Breakfast

The first activity, scheduled for the fourth week of July, was on a topic, whose significance we all know about, yet disregard - Breakfast. Eating a healthy breakfast before starting the school day is linked to improved concentration, better test scores, increased energy, a higher intake of vitamins and minerals, and even a healthier body weight. Breakfast is especially important for young students whose brains use up about half of the body's energy. Considering the above-mentioned advantages of a healthy breakfast, and to enhance awareness among students, the health club decided that it was the need of the hour to address young children about the importance of breakfast. The awareness speech was given by the health club coordinator, who addressed students of classes 5 and 6 on July 21, 2022.
